ORGANIC COFFEE

Our organic filter coffee is sourced for us by Extract Coffee via the Sol & Café Co-operative in Peru,

The Honduran Liquidambar derives from an organic farm in the San Marcos region at an altitude of 1530masl. After processing, the cherry pulp is recycled as compost, with the help of the Californian red worm, and reused on the farm. Great care is taken to protect the water resources of the farm, which also serve the local community and indigenous wildlife. Social, as well as environmental responsibility, are paramount here. Coffees are handpicked and sorted by a team of skilled workers who are housed and provided with medical care by the farm.
